

## **What is an adaptation?**

### **Success Criteria:**

- Describe different environments.
- Match animals to the best suited environment.
- Know the definition of 'adaptations' and can give examples.
- Know how animals and plants adapt to different environments.

In this lesson, we will be learning about adaptations. We will be looking at the conditions in different environments and the characteristics that animals have that help them to survive. We are then going to design our own creatures that are adapted to an environment! You will need a pen, pencil, coloured pencil (or something to mark with), a ruler and a piece of paper for this lesson.

The link below which will take you to today's lesson, when you are ready click 'Start Lesson' and this will take you the video. You are to watch the video and pause the video to complete the activities when you are asked to. Once you have completed the video lesson, there is a quiz so that you can test yourself on what you have learnt during the lesson.

Please remember to take a picture of your work from this lesson and send it to your teacher in charge of your home learning this week. We look forward to seeing your own design on an organism!
