

My D-Day Plan

Imagine you are responsible for planning the liberation of France for the Allies.

Annotate this map of the D-Day beaches with your plan for the landings.

Remember your aim is to liberate France and you must think about how you can get a strong foothold in Normandy to support the Allied troops with further weapons, supplies and troops. Think about the weather and ideal conditions for this invasion!

Your resources:

- Approximately one million troops
- Air superiority based in Great Britain
- Naval superiority from eight Navies
- Paratroopers (soldiers who can be parachuted into enemy lines)
- Intelligence from France-based French Resistance
- Landing craft, warships, tanks, artillery, minesweepers

- Explain your approach to the landing. What will help your troops to succeed?
